NASSAU COMMUNITY COLLEGE
Department of
Mathematics / Computer Science / Information Technology

Course Syllabus for ITE254 Web Programming 2

Course Information

Title:	Web Programming 2
Course Number:	ITE 254
Credits:	3.0 Credits
Section:	
Semester / Term:	
Meeting Times / Location:	

Instructor/Contact Information

Professor Name:	Prof. Jared M. Ganson
Office Location:	C-3085
Office Hours:	
Office Phone:	516-572-7977
Email Address:	jared.ganson@ncc.edu
Website URL:	http://newton.ncc.edu/gansonj

Course Description
This course is an introduction to the fundamentals of programming using a modern object-oriented scripting language such as JavaScript. Object-oriented and fundamental programming concepts are covered along with events, event handlers, both built-in functions and user-defined functions, predefined and user- defined objects, web form validation and browser considerations. Projects and assignments will mirror real-world applications and usage. Laboratory fee applies.

Course Pre-requisite
At least a C or better in ITE 101 and CSC 104. Students must have satisfied all MAT, ENG and RDG remediation requirements prior to starting this course. (3.0 lecture hours).

Learning Outcomes and Objectives
To provide a background in computer programming.

Course Syllabus for ITE254 Web Programming 2

SUNY General Education Goals & Outcomes

1. Algorithms
Students should understand variable usage and basic algorithm creation.

Outcome
1.1 Creating Variables
Students should be able to create variables with assigned values from within the program or user-input.
1.2 Using Variables
Students should be able to use variables within calculations to solve problems.

2. Decision Making
Students should learn how to produce a decision making program using an if statement.

Outcome
2.1 If Statements
Students will create if statements within their code to solve various programming problems.

3. Creating Loops
Students will learn how to create loops with their code to avoid programming redundancy and promote atomization of repeating code.

Outcome
3.1 "For Loops" and "While Loops"
Students will demonstrate the correct usage of "for loops" for definite looping situations and "while loops" for indefinite looping situations, to assist the solutions of various programming problems.

4. Programmer Created Functions
Students should be able to work with programmer created functions.

Outcome
4.1 Creating Functions
Students will create functions to solve various programming problems incorporating calls to language created functions.

5. Validating Data
Students will be bale to work with user input validations.

Outcome
5.1 Validating Data
Students will apply various programming techniques (incorporating loops and arrays) to validate data that has been entered by the user.

Course Syllabus for ITE254 Web Programming 2

Instructional Methods

This course is taught using a variety of instructional methods including lecture, class discussion and hand-on computer lab instruction.

Textbook and Materials

JavaScript: A Beginner's Guide, 4th edition by John Pollock. Published by McGraw Hill
ISBN-13: 978-0071809375 ISBN-10: 0071809376

Student Responsibilities/Course Policies

Instructors need to complete the following for their specific policies. It is recommended that in class exams are required.

Homework:	10-15 assignment 40% of final grade
Exams / Quizzes:	3 examinations, 60% of final grade
Attendance / Lateness Policy:	3 unexcused absences allowed, 5 points final grade for each absence over 3 unexcused absence. 3 lates equals 1 absence.
Missed Exam / Quiz Policy	Zero for missed exams, doctor's note exception

Academic Dishonesty & Plagiarism

Academic dishonesty, which includes plagiarism and cheating, will result in some form of disciplinary action that may lead to suspension or expulsion under the rules of the Student Code of Conduct. Cheating can take many forms including but not limited to copying from another student on an examination, using improper forms of assistance, or receiving unauthorized aid when preparing an independent item of work to be submitted for a grade, be it in written, verbal or electronic form. Anyone who assists or conspires to assist another in an act of plagiarism or any other form of academic dishonesty may also be subject to disciplinary action.

Plagiarism is a particular type of academic dishonesty that involves taking the words, phrases or ideas of another person and presenting them as one's own. This can include using whole papers and paragraphs or even sentences or phrases. Plagiarized work may also involve statistics, lab assignments, art work, graphics, photographs, computer programs and other materials. The sources of plagiarized materials include but are not limited to books, magazines, encyclopedias or journals; electronic retrieval sources such as materials on the Internet; other individuals; or paper writing services.

A student may be judged guilty of plagiarism if the student:

(a) Submits as one's own an assignment produced by another, in whole or in part.
(b) Submits the exact words of another, paraphrases the words of another or presents statistics, lab assignments, art work, graphics, photographs, computer programs and other materials without attributing the work to the source, suggesting that this work is the student's own.

Allegations of student plagiarism and academic dishonesty will be dealt with by the appropriate academic department personnel. It is the policy of Nassau Community College that, at the discretion of the faculty member, serious acts will be reported in writing to the Office of the Dean of Students, where such records will be kept for a period of five years beyond the student's last semester of attendance at the College. These records will remain internal to the College and will not be used in any evaluation made for an outside individual or agency unless there is a disciplinary action determined by a formal ruling under the Student Code of Conduct, in which case only those records pertaining to the disciplinary action may apply. A student whose alleged action is reported to the Office of the Dean of Students will be notified by that office and will have the right to submit a letter of denial or explanation. The Dean will use his/her discretion in determining whether the alleged violation(s) could warrant disciplinary action under the Student Code of Conduct. In that case the procedures governing the Code of Conduct will be initiated.

Copyright Statement

The Higher Education Opportunity Act of 2008 (HEOA) requires the College to address unauthorized distribution of copyrighted materials, including unauthorized peer-to-peer file sharing.

Thus, the College strictly prohibits the users of its networks from engaging in unauthorized distribution of copyrighted materials, including unauthorized peer-to-peer file sharing. Anyone who engages in such illegal file sharing is violating the United States Copyright law, and may be subject to criminal and civil penalties. Under federal law, a person found to have infringed upon a copyrighted work may be liable for actual damages and lost profits attributable to the infringement, and statutory damages of up to $150,000. The copyright owner also has the right to permanently enjoin an infringer from further infringing activities, and the infringing copies and equipment used in the infringement can be impounded and destroyed. If a copyright owner elected to bring a civil lawsuit against the copyright infringer and ultimately prevailed in the claim, the infringer may also become liable to the copyright owner for their attorney's fees and court costs. Finally, criminal penalties may be assessed against the infringer and could include jail time, depending upon the severity of the violation. Students should be aware that unauthorized or illegal use of College computers (such as engaging in illegal file sharing and distribution of copyrighted materials), is an infraction of the Student Code of Conduct and may

subject them to disciplinary measures. To explore legal alternatives to unauthorized downloading, please consult the following website: http://www.educause.edu/legalcontent.

Course Resources

Suggested websites:	https://www.w3schools.com
Library services:	Course textbook is available at the reference desk at the NCC library.
Labs and learning centers:	As part of this course, students should avail themselves to further study and/or educational assistance that is available in the Computer Center in B225.
Extra help options:	Office hours if available and the Computer Center in B225.

Assessments and Grading Methods

Provide a clear explanation of evaluation, including a clear statement on the assessment process and measurements. Be explicit! Include format, number, weight for quizzes and exam, descriptions of papers and projects as well as how they will be assessed and the overall grading scale and standards.

Examinations

There will be a total of 3 examinations throughout the semester that will constitute 60% of your final grade. There are **NO** make-up examinations, exceptions will only be made in the case of serious illness and after a valid doctor's note has been submitted. Absence from an exam will result in a grade of zero for that exam.

Homework Assignments

There will also be approximately 10-15 homework assignments that will constitute 40% of your grade. The homework grade has an initial value of 100, and a value of (round(100 divided by the number of homework assignments)) will be subtracted for each assignment not completed. Assignment submissions are due by the assigned date and time of said assignment. Homework may be uploaded within 1 day after due date for half credit

Attendance Policy

Class attendance is mandatory, and you are expected to arrive to class on time and stay in class the entire period. Students are permitted 3 unexcused absences throughout the semester. Students who are absent more than 3 times throughout the semester will be penalized by a reduction of 5 points from your final average.

> 3 unexcused absences	5 points deducted from your final average For each unexcused absence over 3
Every 3 lates	Equals one absence. You are considered late if you arrive to class after I am done taking attendance.
Constant leaving classroom	Will be addressed on a need be basis

Americans with Disabilities Statement & Non-discrimination Statement (NCC Required)

If you have a physical, psychological, medical, or learning disability that may have an impact on your ability to carry out the assigned coursework, I urge you to contact the staff at the Center for Students with Disabilities (CSD), Building U, (516) 572 – 7241, TTY (516) 572 – 7617. The counselors at CSD will review your concerns and determine to what reasonable accommodations you are entitled as covered by the Americans with Disabilities Act and section 504 of the Rehabilitation Act of 1973. All information and documentation pertaining to personal disability will be kept confidential."

Course Syllabus for ITE254 Web Programming 2

Course Schedule and Important Dates

Provide a detailed list of meeting dates, topics, assignments, and due dates for all exams, scheduled quizzes, papers, projects, assignments, labs, etc. Use a grid format to help students easily read and understand the information.

Week Number	Date	Topic
Week 1		Class Introduction Briefly review HTML Review CSS Classes and IDs
Week 2		CSS Review **Project #1 CSS related assignment**
Week 3		Begin JavaScript basics Event Handlers Function calls Variables and memory Obtaining input using document.getElementById() Producing and displaying simple output
Week 4		Strings vs. Numbers; parsing Calculations Producing more complicated output and concatenation IF ELSE statements Conditions Conditional operands **Project #2 IF statement related assignment**
Week 5		Nesting IF statements Complex conditions && and || **Exam #1**
Week 6		Loops Definite loops / Indefinite Loops Counter variables FOR loop
Week 7		FOR Loops Calculations within loops Building a table with a loop Math Functions

Week 8		FOR Loops **Project #3 FOR loop related assignment**
Week 9		FOR Loops WHILE LOOPS
Week 10		WHILE LOOPS
Week 11		Review **Exam #2**
Week 12		Secondary Functions Used to avoid redundant code Passing data Arguments and Parameters Returning data **Project #4 Functions related assignment**
Week 13		Secondary Functions
Week 14		Secondary Functions
Week 15		Review **Exam #3**
